Bug Fix Report

Team 5
Team 3

Issue: Log in page
- to be implemented
Solution: Implemented functional Log in page with database connection

Issue: Empty space in home page
Solution: Updated FXML elements to better fit the available space

Issue: Create new project button
- not functioning
Solution: Updated the create new project button to create Project elements

Issue: Task
- hard coded
Solution: Updated the Task functionality to connect to and retain data from the database

Issue: Description
- no description
Solution: Description editing is now available

Issue: Task page
- page is empty
Solution: Task page can now be populated with new Tasks or existing Tasks from the database

Issue: E button
- under task page not functioning
Solution: Edit button now communicates with the Task element in the database

Issue: Create new task, settings, save and team buttons
- not working
Solution: Buttons now properly communicate with their controllers and the database
